

ECO PARK.LOT

Hybrid Energy-Harvesting Smart Parking System

THE CHALLENGES

1. Energy Waste

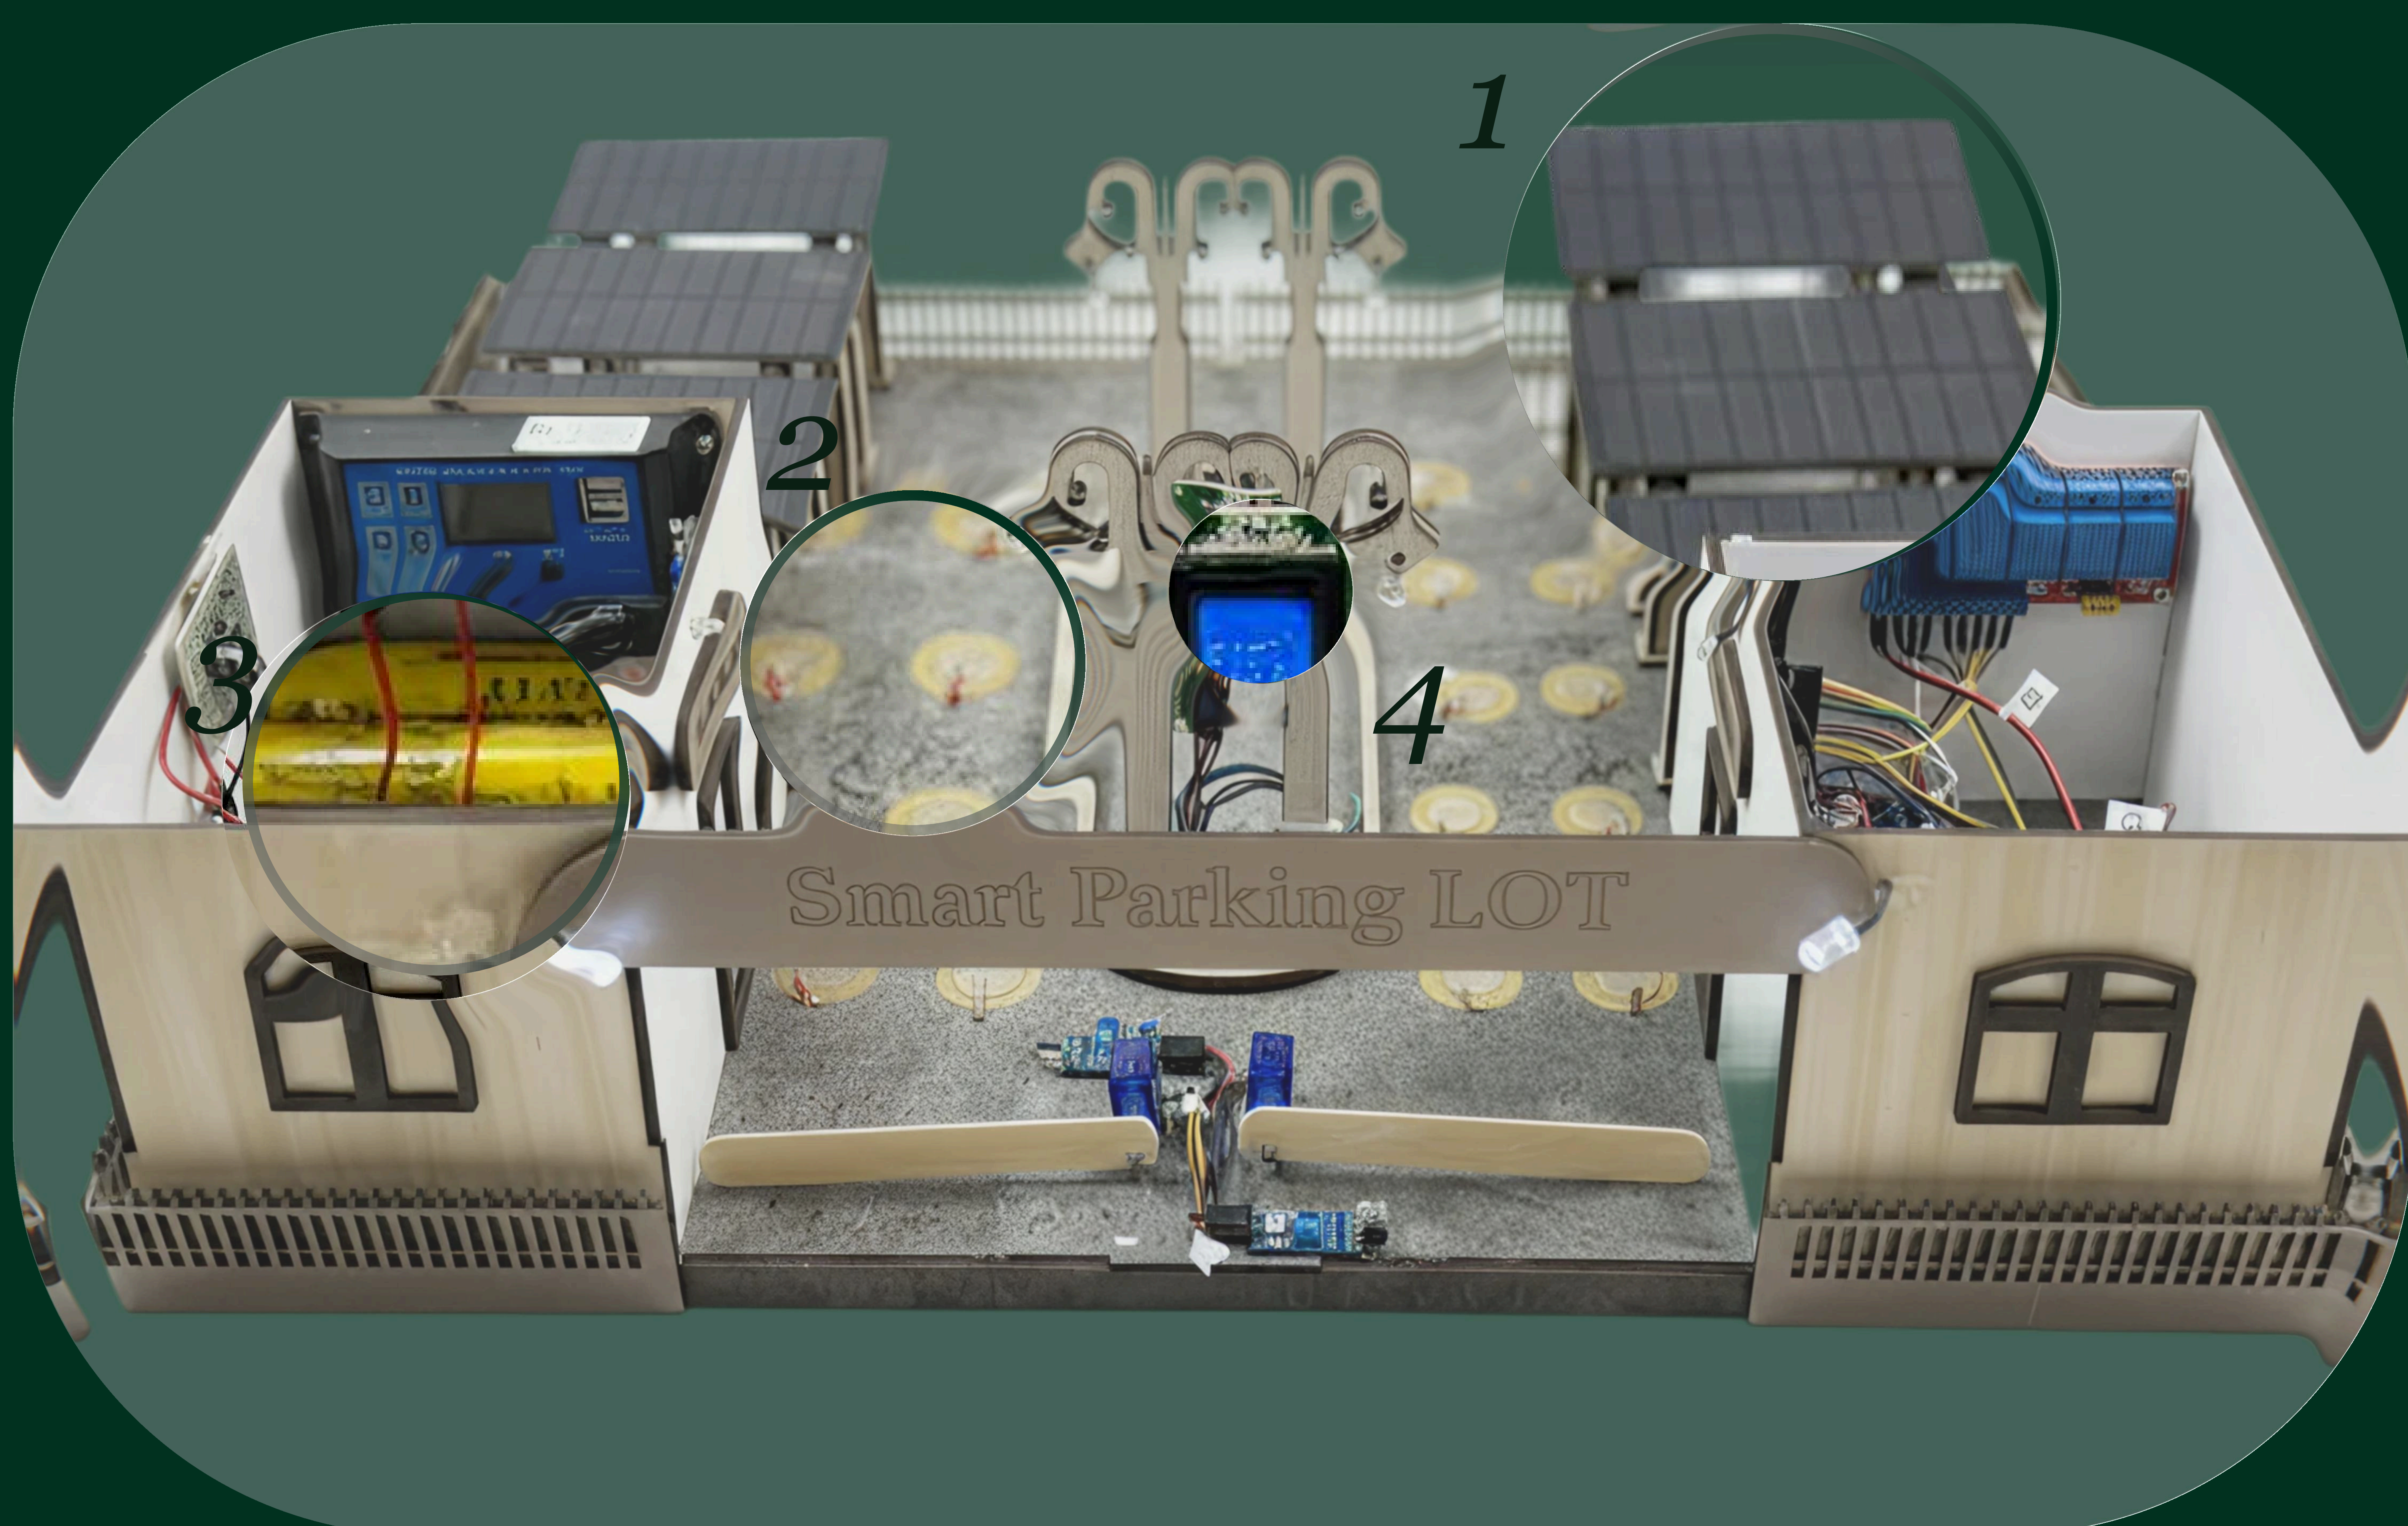

Urban lots consume without giving back

2. Time Waste

Wasting time for Finding a Empty slot.

3. CARBON IMPACT

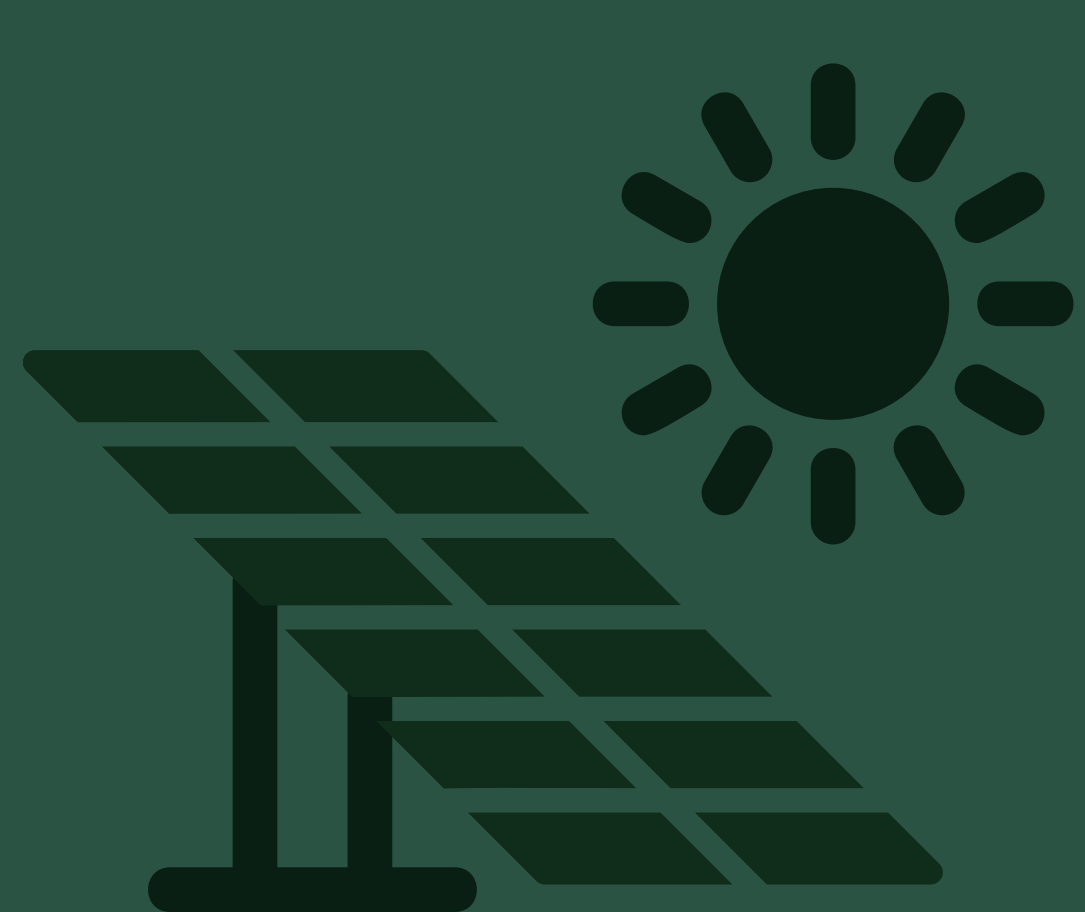

Wasting time for Finding a Empty slot.

OUR SOLUTION

1. Solar Harvesting

PV Panels Capture Sunlight Energy

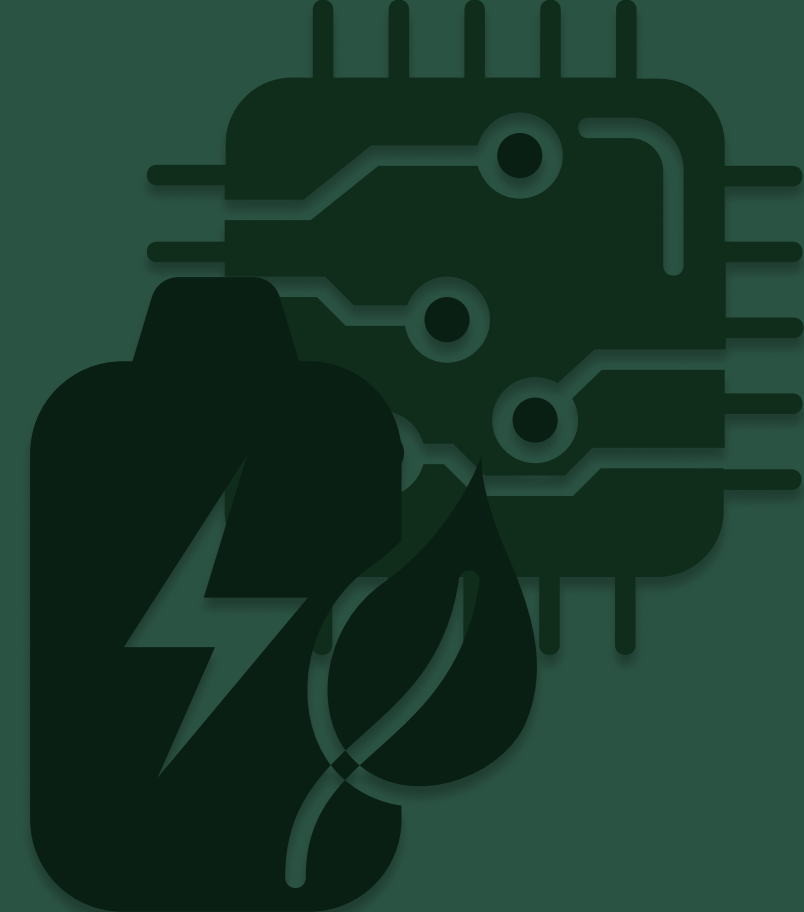

2. Piezo Capture

Vehicle pressure generates voltage

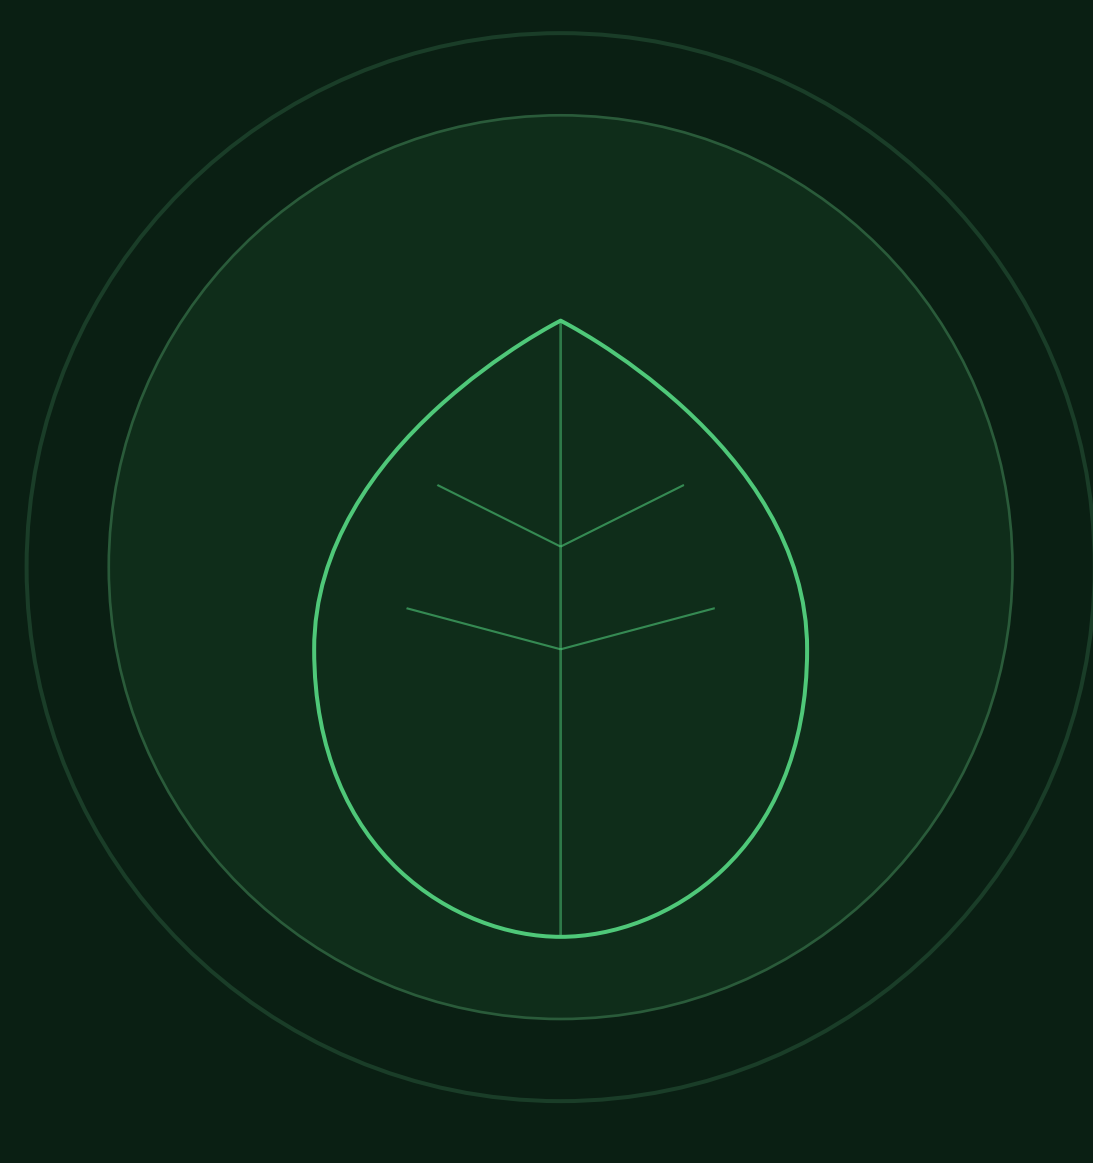

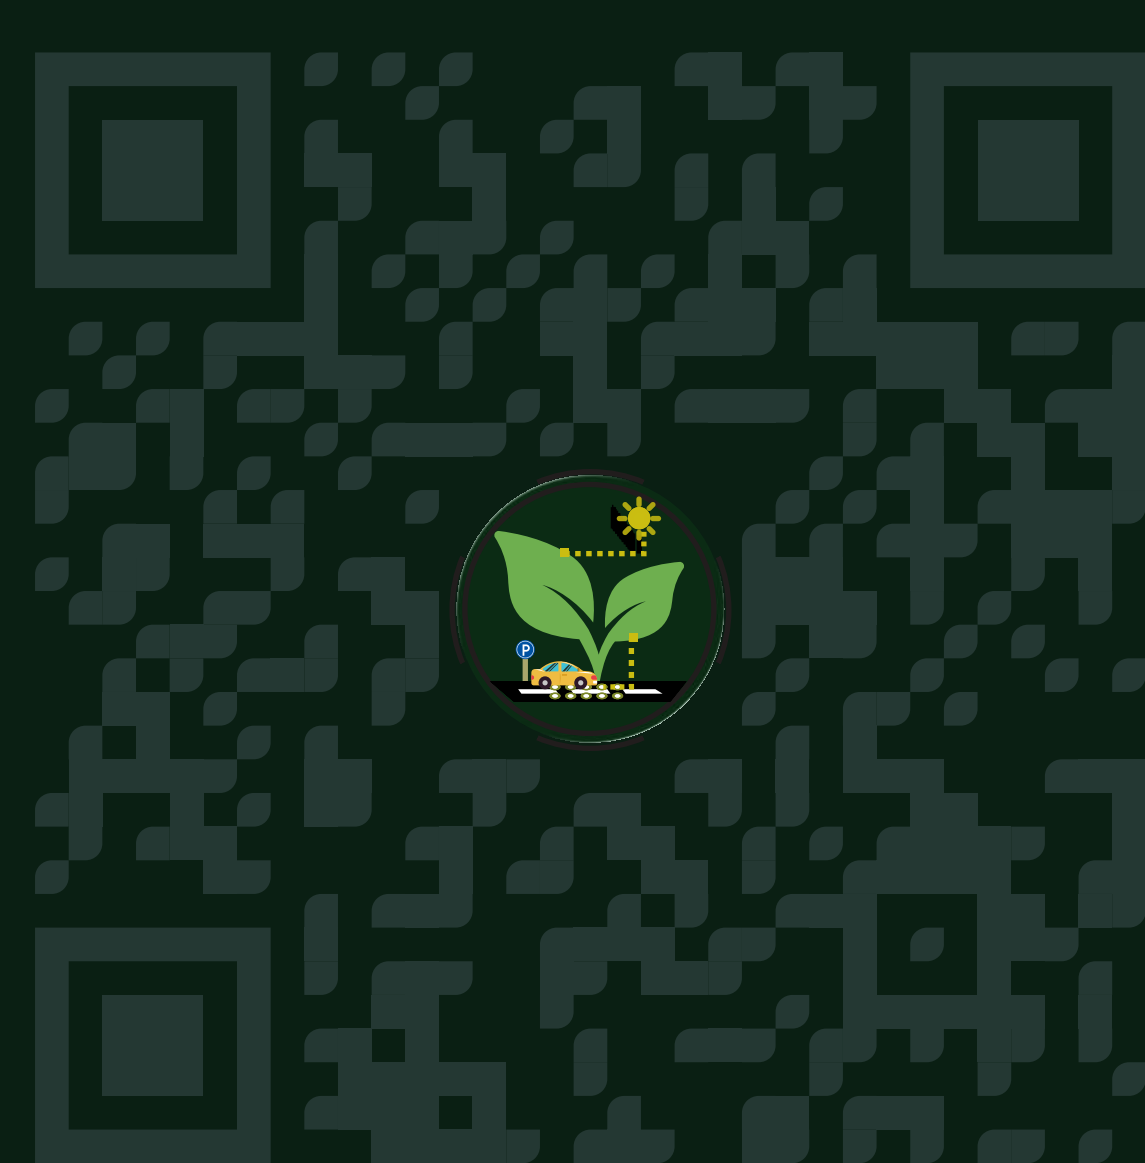

3. Regulate & Store

Arduino manages dual power flow & Battery Storage

4. Monitor & Display

Live dashboard slot availability
